Overview

This document includes the OnSight Embedded for iOS software release notes for Major Revision number 7 including a description of new features, resolved issues and a list of Known Issues.

All releases of OnSight Connect software have been validated with their concurrent release of OnSight software products and are compatible with the previous revision of all OnSight products.

The OnSight operations-driven video collaboration system provides interactive video, audio, images and telestration to immediately connect remote teams, suppliers and customers. Using OnSight Connect, teams can collaborate fully across distant locations to quickly solve problems, monitor projects and improve overall communication.

IDE Requirements

OnSight Embedded for iOS SDK requires minimum Xcode version 7.

Target Equipment

OnSight Embedded is intended for application development for iOS version v8.0 or higher on the following iOS devices:

iPod
iPod 5th and 6th generation

iPad
iPad Air, iPad 2, 3, and 4, iPad mini 2, 3, and 4

iPhone
iPhone 4S, 5, 5c, 5s, 5se
iPhone 6, 6 Plus, 6s and 6s Plus

Software Release Notes for Version 7.1.2

New Features

HD Video Support

Stream HD video with other HD capable OnSight endpoints.

Image Sharing

Capture and Share Images with other OnSight Embedded endpoints.

Personal Contact List

Retrieve the Personal Contact List of the OnSight Embedded user.

Call Statistics

Enable Call Statistics tracking for outgoing and incoming calls for an OnSight Embedded application. View call statistics results from the OnSight Account Manager.

Audio Source

Restore Audio to OnSight call when an already existing cellular call has ended.

Video Source

Get Video Source capability reports from an OnSight Embedded application.

Configuration File Encryption

Support for Configuration File Encryption in an OnSight Embedded application.

TLS v1.2 Support

Added support for TLS v1.2.

Apple IPv6 Support

IPv6 Network Support for Apple's June 1, 2016 App Store requirement.

Changes and Improvements since Previous Version

- Various minor fixes and improvements

Known Issues

V6.7: "Video decoder not found Please update your device to iOS8.x to decode incoming video properly". 64-bit devices running iOS7 do not have a video decoder installed and therefore are unable to decode incoming video. Solution is to upgrade to iOS v8.X.#10775
