

SECURE ENTERPRISE GRADE CONTROLS.

ONSIGHT CENTRALIZED MANAGEMENT SIMPLIFIES AND CONTROLS DEPLOYMENTS.

Librestream provides a comprehensive management system that delivers centralized control over the entire Onsight platform. With strong security enforcement, privacy options, and bandwidth management, the Onsight system meets internal IT and security requirements.

ASSIGNED ADMINISTRATORS CAN ACCESS THE SECURE ONSIGHT PLATFORM MANAGER TOOL TO MANAGE A BROAD RANGE OF POLICIES, REPORT ON USAGE, AND IMPLEMENT CUSTOM BRANDING.

- Enforce enterprise security policies and distribute certificates
- Set maximum bandwidth consumption levels
- Create custom media configurations to simplify operation
- Set privacy policies for control over image capture and recording
- Create groups of users to simplify management
- Identify users or groups that need 'Expert' or 'Field' user interfaces
- Manage Onsight deployment – add, delete, or set expiry dates for user licenses
- View dashboard of the user license pool for a quick overview
- Send Welcome messages with links to download the software
- Create custom branded Guest Invite and Welcome messages

ONSIGHT ADMINISTRATORS CAN ACCESS USAGE STATISTICS AND CALL REPORTS TO TRACK AND AUGMENT ADOPTION PROGRAMS. ONSIGHT CENTRALIZED MANAGEMENT DIFFERENTIATORS INCLUDE:

SECURITY ENFORCEMENT

Multiple levels of security over access and content.

USAGE REPORTING

Track and identify usage across individuals and groups for adoption programs.

CUSTOM BRANDING

Brand your experience with custom messages or go all the way with an integrated app using Onsight Embedded.

PRIVACY CONTROL

Option to control which users can capture images and create recordings.

TEAMLINK FIREWALL TRAVERSAL

Connect users across different networks with TeamLink.

BANDWIDTH CONTROL

Set maximum bandwidth levels to control usage and customize configurations.

THE ONSIGHT COLLABORATION PLATFORM CAN BE DEPLOYED WITHIN A FULLY HOSTED, ON PREMISE OR HYBRID MODEL.

SECURE ONSIGHT HOSTED SERVICES INCLUDE:

Onsight Session Initiation Protocol (SIP) Service

Ideal for customers that do not already have internal video conferencing or TelePresence call infrastructure. The Onsight SIP service provides an immediate, secure call connection option.

- Full security with ICSA certified firewall traversal equipment and encryption options
- High reliability with equipment redundancy and automated failover capabilities
- Fully managed service by Librestream to reduce IT workload
- Scales as your organization deploys across the enterprise

Onsight TeamLink Service

Ensures that your calls will tunnel through firewalls, providing connection across external networks such as customer facilities or supplier locations.

- Smart connection feature that automatically selects the best connectivity method available – SIP, HTTPS, HTTP
- Selection process is automatic and transparent to the user
- Support for SIP-TLS and AES encryption for end-to-end content security

Onsight Guest Invite Service

Available to customers with the Onsight Enterprise licensing option, the Onsight Guest Service provides a quick way to invite external teams to secure Onsight sessions.

- Simply enter the guest's name, contact info, and optional custom note
- Guest receives SMS or email with download information and link to call immediately
- The guest license returns to the pool automatically upon expiry
