

ONSIGHT CONNECT FOR WINDOWS (PC AND TABLETS)

Following are instructions on the features of Onsight Connect on a PC or Tablet.

Step 1: When you are allocated an Onsight license, you will receive a Welcome Email with links to download Onsight Connect software.

Step 2: Software Download: follow prompts.

Step 3: Log In: Enter Username and Password. Tick the 'Remember Me' box for future auto login.

Step 4: System Health: Before launching a collaboration call, check that all indicators are green before proceeding. If not, contact your Onsight Admin.

Step 5: Add a Contact: 1) Click Contacts, 2) Click the Globe button to Search the Directory to add contacts.

Step 6: Search Contacts: By personal name or by groups. Add the contact individually or add a whole group by clicking the 'check' button. Next, click the '+' button.

Step 7: Make a Call: Click a contact's name to place a call.

Step 8: Share Video: Once a call is connected, participants can share video by pressing the 'ON' button, or by pressing the 'ON' button of the other participant.

- When sharing video, the 'ON' button will glow.
- End video sharing during a call by pressing the 'ON' button again.
- To end the call, either party can click on the red telephone handset button.

• Pause Video: When you need to collaborate on a detailed picture, click the pause button on the left side of the 'ON' button. Click pause button again to return to streaming live video.

Step 9: Telestration Tools: In addition to telestrating with your finger, add advanced telestration to pictures by clicking the icon to access tools. See Telestration Video* for more detail.

Step 10: Take and Share a Picture: Press the camera button to take a picture, or press and hold the camera button to take a picture and share it during a call.

Note the glowing 'ON' button and blue border around the still picture when it is being shared. Note the small inset box on the right continues to stream live video.

Step 11: Record Video: click the blue button to the right of the ON button to start recording video. The button will turn red when recording is activated. All participants will see a red dot in the upper right corner indicating video is being recorded. Click red button to stop recording.

Step 12: Media Configs: by default, the call will start at a low setting; if you need better video quality increase the bandwidth setting.

Step 13: Tool Tips: If you cannot remember what a button does, click Tool Tips '?'.
