

DIGITIZE YOUR WORKER'S DAY WITH AUGMENTED REALITY.

The Onsight Augmented Reality Service Platform provides individual workers and teams with the digital tools they need to rapidly inspect, diagnose, and troubleshoot assets from anywhere. The platform includes remote expert assistance, digital work instructions, field intelligence, specialized inspection accessories, and central management with data analytics. Deployed globally, Onsight can scale with your operation and meets the needs of the most stringent IT and security environments.

PLATFORM HIGHLIGHTS

REMOTE EXPERT

Engage remote experts with live video, audio, telestration and images.

DIGITAL WORK INSTRUCTIONS

Create, assign, and execute work instructions and analyze data.

FIELD INTELLIGENCE

Share, access, view and analyze content securely in difficult field environments.

SPECIALIZED ACCESSORIES

Use optional specialized accessories for unique inspection use cases.

ONSIGHT AUGMENTED REALITY SERVICE PLATFORM

Designed to perform across field environments, Onsight is safe, secure, and always reliable. Managed centrally, enterprises can control, scale and analyze performance.

SOFTWARE TOOLS

ONSIGHT CONNECT

Remote expert software that runs on the smartphone, tablet, smart glasses, and computers of your field workers and remote experts.

ONSIGHT FLOW

Create, assign and execute digital work instructions. Manage and assign jobs to team members and monitor job status.

ONSIGHT WORKSPACE

Specialized field intelligence for industrial teams to securely create, access, share, and analyze content.

SPECIALIZED ACCESSORIES

ONSIGHT CUBE

Multi-purpose industrial wearable with built-in HD optical and thermal capabilities for complete asset analysis.

ONSIGHT HUB

IoT inspection device that connects specialized test instruments, such as videoscopes and ultrasound devices.

BACK-OFFICE INTEGRATION

Integrate the Onsight Platform to your back-office systems for cohesive end-to-end system visibility, metadata augmentation, and enhanced business intelligence.

The Onsight APIs provide seamless integration into back-office systems with REST API support. Simply start a Connect call, share a Flow job or access Workspace content directly from your back-office system. As part of your workflow, automatically tag content with relevant metadata for advanced searching and analysis.

DIGITALLY-ENABLED TEAMS DELIVER RESULTS

- Mentor and train junior staff, **33% faster**
- Cut support call length, **by 50%**
- Perform remote maintenance, **60% faster**
- Accelerate new product time to market, **10-20%**
- Increase equipment uptime, **5-10%**

PROFESSIONAL SERVICES

CUSTOMER SUCCESS PROGRAM

Choose from a range of services that help you meet from initial launch to deployment at scale.

- Deployment: use cases, communication plans, business analysis
- Education: e-learning programs, webinars, classroom training
- Adoption: gamification, usage analysis, best practices

ECOSYSTEM INTEGRATION

Librestream offers a range of services to integrate the On Sight platform within your broad digital ecosystem and branding strategies.

- API integration services
- Custom App branding
- Data analytics & reporting

SECURITY AND IT SERVICES

Our security and IT service team work with you to complete security and network assessments, perform configuration management for hosted or on-premises, and full technical support.

- Security & network optimization for platform
- Configuration management – hosted and on-premise solutions
- Technical support – phone, email, FAQs, case reporting
