

# How To: Enable Single Sign On For Web App Login

**Single Sign On (SSO)** can be enabled for enterprise customers to use one account for your domain when logging into **Onsight Platform Manager (OPM)** and **Onsight Connect for Web App**. The benefits of SSO are:

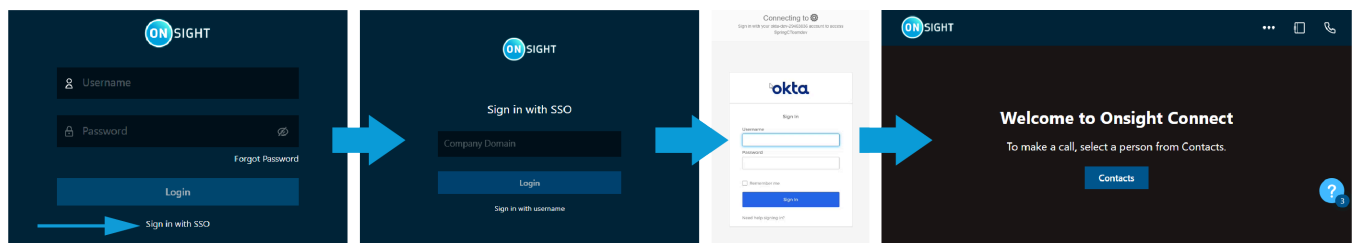

- No need to type in credentials
- No need to remember/renew passwords
- No weak passwords

**Note:** SSO must be enabled for your account by your system administrator.

## Overview

**Figure 2. Single Sign On for the Web App**

In order to enable single sign on, you will need to launch an approved web browser and access the **Onsight Connect for Web** (<https://connect.onsight.librestream.com>) on your device and:

1. Click the **Sign in with SSO** option.
2. Enter your **Company Domain** information and click **Login**.
3. Enter your login credentials within the **Identity Provider** and click **Sign In**.

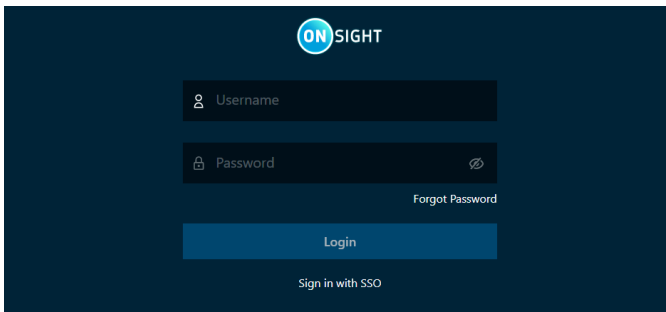

**Tip:** Click the **Need help signing in?** link if you encounter any challenges.

**Note:** You can revert back to using the standard login screen by clicking the **Sign in with username** link at the bottom. Please contact [support@librestream.com](mailto:support@librestream.com) if you need assistance with logging in using SSO.

## Enabling SSO for Web App

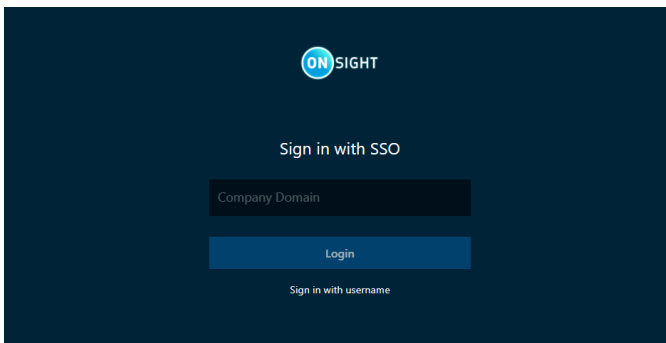

In this task, you will enable SSO for the Web App. To enable SSO, you must:

1. Launch a web browser and access the [Web App](#).

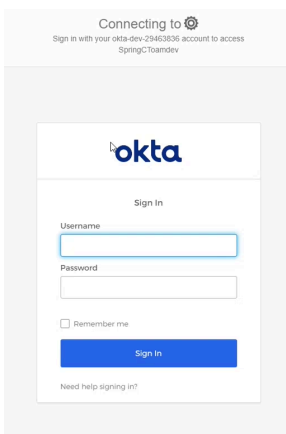

**Figure 3. Identity Provider Sign In**

2. Click the **Sign in with SSO** link near the bottom. The **Sign in with SSO** window appears.

**Figure 4. Identity Provider Sign In**

3. Enter your Company's Domain address within the **Company Domain** field. For example, enter `Acme.com`.
4. Click **Login**.

**Figure 5. Identity Provider Sign In**

5. The **Identity Provider > Sign in** window appears. Enter your:
  - a. **Username**
  - b. **Password**
  - c. Enable the **Remember me** check box to automate and speed-up the login process.
6. Click **Sign in**.  
This completes the procedure.
