**EMPOWERING  
SERVICE  
OPERATIONS.**

# HANDS FREE COLLABORATION FROM THE FIELD.

For many enterprises, a hands-free wearable camera solution is an important capability especially for field service and technical teams. Using Librestream's Onsight virtual presence platform, a standard wearable action camera can now provide this hands-free experience.

Simply connect the wearable video camera to the Onsight 400R Collaboration Hub to augment visuals from the built-in camera on your smartphone or tablet. Through the Onsight Connect collaboration software, connect to a Wi-Fi, cellular, or satellite network, to immediately share and collaborate on these live visuals with remote subject matter expert.

**WEARABLE ACTION CAMERA**

Connect a bullet-cam or box-shaped wearable camera to the Onsight 400R. Librestream tests Onsight with a variety of action cameras. Contact us for a current list.

**ONSIGHT CONNECT SOFTWARE**

Share live voice, video, images and telestration between field workers and experts. Onsight Connect includes advanced controls to collaborate on things in the field.

**ONSIGHT COLLABORATION HUB\***

The Onsight 400R is an Internet of Things (IoT) device that connects wearable cameras, specialized test equipment and many other audio and video devices.

**WIRELESS RUGGED HEADSET**

Connect a wired or Bluetooth® wireless headset to your smartphone or tablet for clear voice communication with remote experts.

## VIRTUAL PRESENCE: EMPOWERING SERVICE OPERATIONS

Connect your wearable device through the Onsight 400R.

Collaborate with remote experts using Onsight Connect to share live visuals and more from the field.

## HANDS-FREE COLLABORATION FOR REMOTE INSPECTIONS, REPAIRS AND SITUATIONAL AWARENESS.

EXPERIENCE BENEFITS RANGING FROM INCREASED SAFETY, FASTER ISSUE RESOLUTION TO COST SAVINGS AND IMPROVED TRAINING.

### HANDS FREE INSPECTIONS AND REPAIRS

**The Situation:** A field technician is at a customer location inspecting and repairing equipment. The tech needs input from a remote subject matter expert to diagnose the issue and confirm corrective steps.

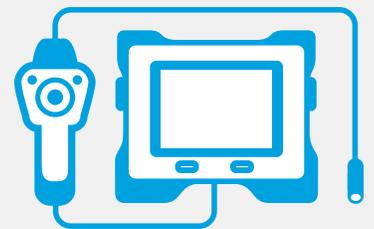

**The Solution:** By attaching a head-mounted or body worn wearable camera through the Onsight 400R, the tech is now able to use both hands, while collaborating with remote subject matter experts using Onsight Connect.

### SITUATIONAL AWARENESS FOR MOBILE WORKERS

**The Situation:** Emergency response teams are deployed on site after a natural disaster to assess the surroundings and triage activities. They need to share live visuals with central command center personnel.

**The Solution:** Equipping teams with wearable cameras on their chest or mounted on their helmets, teams have a second set of eyes assessing the area for potential danger such as weakened structures.

Librestream's virtual presence platform is deployed on over 10 million devices globally, providing a proven video collaboration capability to service, manufacturing, energy, insurance, and public sector organizations.

In addition to hands-free collaboration, the Onsight platform connects millions of Non Destructive Testing (NDT) and Remote Visual Inspection (RVI) instruments to share critical visuals from borescopes, ultrasonic, thermal imaging, and more.
