Overview

This document includes the Onsight Flow for Android software release notes for Major Revision number 7 including a description of new features, resolved issues and a list of Known Issues.

All releases of Onsight Connect software have been validated with their concurrent release of Onsight software products and are compatible with the previous revision of all Onsight products.

The Onsight operations-driven video collaboration system provides interactive video, audio, images and telestration to immediately connect remote teams, suppliers and customers. Using Onsight Connect, teams can collaborate fully across distant locations to quickly solve problems, monitor projects and improve overall communication.

Software Installation

To install Onsight Connect for Android software, go to <https://librestream.com/onsight-support/> or Google Play. The Onsight Connect App is available for download at no charge. A valid Onsight user license is required to login and operate the application.

Required Equipment

Onsight Flow for Android

Onsight Flow for Android requires smartphones running Android v4.1 (Jelly Bean) or higher.

Release Notes Version 2.5.918.10516

Initial Release

Onsight Flow helps you transform your paper-based processes into digital work instructions for enterprise-grade wearables, smartphones, or tablets. Your teams can rely on step-by-step instructions or digital forms that include access to relevant content, simplified data capture, and digital sign off procedures.

Key product features

- Create step-by-step instructions or digital forms with the drag-and-drop builder
- Launch digital instructions with embedded QR codes and deep links
- Schedule, assign, and manage jobs for individuals or groups
- Capture machine data, time, date, and geo-stamp steps for future analytics
- Build custom dashboards and reports for powerful data analytics
- Integrate your existing systems via open APIs
- Engage with remote experts using Onsight Connect

Known Issues

#17040: Login screen does not have 'Forgot Password' link. The Administrator must reset the password on the Team Server.
#17036: New users do not receive a Welcome email from the Team Server, Administrators must send login info to the new user.
#17035: Video steps after the initial video is captured are incorrectly labeled with 'retake video'. Subsequent video captures are correctly captured despite the incorrect labelling.
